Sun and Moon

The earth is one of the nine planets that travel around the sun.
We live on the planet earth.
The moon circles around the earth once a month.
Nine planets, including the earth travel around the sun.

Sun lights the day.
Moon lights the night.
Earth keeps movin' 'round the sun. (4x)

The sun is by far the largest object in the solar system.
It is often said the sun is an ordinary star.
In the center of the sun there are extreme temperatures.
No superhero could stand the heat of the sun, not even superman!
The space shuttle or any other space craft could ever land on the sun.
The sun would make toast of anything that comes near it.
There are cool regions on the sun called sunspots.
But don't be fooled, the coolest spot on the sun would turn a piece of bacon into pig dust quicker than you can say
Jack Jack

Chorus

Sun lights the day.
Moon lights the night.

Earth keeps movin' 'round the sun. (4x)

The moon is the second brightest object in the sky after the sun.
The moon orbits around the earth once per month.
The moon is the only extra terrestrial body to have been visited by humans.
The moon also is the only body from which samples have been returned to earth.
The gravitational forces between earth and the moon cause some interesting effects.
The most obvious are the tides.
Tides are the rising and lowering of the sea level, also known as high tides and low tides.
They are greatly controlled by gravitational pull of the sun and the moon.

Chorus

Sun lights the day.
Moon lights the night.
Earth keeps movin' 'round the sun. (4x)

There are nine planets and they are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto!

Can you count with me

Look Ma I can count to 100 (Can you count w/me) Look Pa I can count to 100 (Can you count w/me) Grandma I can count to 100 (Can you count w/me) Grandpa I can count to 100 (Can you count w/me)

Chorus

Thirty one to Sixty

Chorus

Sixty one to One hundred

Chorus

This song is best implemented if the children are on the floor on their knees. During the chorus they are erect and rocking. When they are counting their hands should be placed on the floor in front of them as they bob up and down for each number. When they reach the 10, 20, 30 etc. they should raise their hands in the air and continue bobbing on the ones.

Good Manners

Manners are nice ways to act around other people.

One way to show good manners is to say please and thank you and you're welcome and of course excuse me.

Chorus:

I have good manners I am so polite.

My favorite word is please.

Won't you sing this song with me.

Thank you, you're welcome.

Repeat chorus

May I ride your bike?

Yes you can.

Thank you very much.

May I play with your toys?

Yes you can.

Thank you very much.

May I have a turn?

Yes you can.

Thank you very much.

May I have a bite?

Yes you can.

Thank you very much.

I always use good manners.

When I say please and thank you, people are so nice to me.

Please and thank you are my favorite words.

Chorus 2x

Can I have more milk please?

Yes you may.

Thank you very much.

Can I watch TV please?

Yes you may.

Thank you very much.

Can I go outside please?

Yes you may.

Thank you very much.

Can I have more nuggets please?

Yes you may.

Thank you very much. Now boys and girls, if a grown up is talking to another grown up and you want to say something, you must say, "excuse me." Chorus 4x
